Signaling your intentions while cycling is an important tool for safety and predictability. Cyclists can utilize hand signals by extending an arm to indicate turns or stops and communicate their intentions clearly to other road users. Drivers benefit from recognizing these signals, allowing them to anticipate cyclists’ movements and avoid potential collisions. Using and understanding hand signals increases predictability, enhancing safety and the flow of traffic. Incorporate using hand signals during all rides for your safety and the safety of those around you.

Pedal Into Bike Month: Bike to UCI Day on May 1st

Biking is an enjoyable way for students, faculty, and staff to start their day, commute locally, and stay active. Kick-off National Bike Month with Bike to UCI Day on Wednesday, May 1! On this day, we encourage our community to embrace bike travel to class, work, or simply for leisure. As you make your way around campus this day, visit us at the Engineering Bike Parking Center from 7:30 a.m. to 10:00 a.m. for helpful bike demonstrations while enjoying complimentary refreshments. Be sure to RSVP, and we look forward to seeing you there, Anteaters!

UPCOMING EVENTS & DEMONSTRATIONS

UCI Transportation will host several events and demonstrations during National Bike Month so you can be more knowledgeable about safety, bike care, and bike security!

Visit bike.uci.edu to learn more and stay updated on upcoming events.

2024 April Bulletin

BICYCLIST & PEDESTRIAN SAFETY

Maintaining Safety With Predictability

Predictability is an essential aspect of sharing the road or path with others, especially with increased campus activity during the start of spring quarter. Be predictable by riding with the flow of traffic (UCI Policy 904-13, section 5.3.5), and avoid traveling in blind spots or directly behind others. Cyclists and motorists should always follow designated lane markings, pass others with caution, and give appropriate space. Follow all posted signage, especially those regarding dismount zone hours, which prohibits device riding on Ring Mall between 8:30 a.m. to 5:00 p.m., Monday through Friday. Establish eye contact to ensure you are seen by other users before crossing the street or a shared path. When traveling on shared paths or roadways, practice predictability through proper signaling and awareness as a matter of courtesy and keeping yourself safe.
