# About Us

## Our Mission

The Women in CyberSecurity (WiCyS) Student Chapter at UCI, founded in 2019, is a student organization dedicated to building a strong gender-diverse cybersecurity workforce by facilitating recruitment, retention, and advancement for women in the field. We provide our UCI community with opportunities for cybersecurity education, networking, and empowerment through professional and academic development events, networking and social activities, seminars, panels, and more. We are a fast-growing student organization, with over 90 members joining our chapter in 2023 alone. Our members include students across disciplines and academic paths, including undergraduate and graduate students from computer science and engineering, business, and law.

## Support Us

We are grateful for all those that support the recruitment, retainment, and advancement of women in cybersecurity. We want to offer an opportunity for donors to support the growth of our chapter and members. Our donors will be able to lead workshops and events for our members, reach out to our community through our communication platforms, and take part in our chapter's development and success.

Your contributions will go towards helping our members participate in professional and academic development events, technical workshops, and networking opportunities, as well as to attend the annual national WiCyS conference. Please see the sponsorship tiers for more details.

5th Year
PhD Student
EECS

ROZHIN YASAEI
5th Year
PhD Student
EECS

TASLIMA AKTER
PhD Graduate
Post-Doc
CS

**Lightning Presentations**

BEVERLY QUON
6th Year
PhD Student
EECS

HIEU LE
5th Year
PhD Student
EECS

TAI LE
5th Year
PhD Student
EECS

**About the Workshop**

*This workshop is designed to offer a range of panels and lightning talks that are tailored to help students thrive in graduate school and transition into postdoc and faculty positions. Participants will gain a deeper understanding of the expectations and challenges while pursuing their academic career path.*

WiCyS Seminar Series

WiCyS
WOMEN IN CYBERSECURITY
UNIVERSITY OF CALIFORNIA, IRVINE STUDENT CHAPTER

**WhyCyS: Why CyberSecurity?**

Security of Embedded and Cyber-Physical Systems

**When:** Friday, March 3rd, 3pm
**Where:** ICS1 Room 428

Join us for a talk from **Professor Al Faruque** (EECS Department and Embedded & Cyber-Physical Systems Lab at UCI) about the current state of cyber-physical systems security and both research developments and challenges in the field.

The talk is **open to all**, including newbies in cybersecurity and researchers in the field. **Snacks and refreshments will be provided!**
