ABOUT THE TEAM

Founded in 2011, Anteater Electric Racing (AER) is part of the Henry Samueli School of Engineering specializing in designing, manufacturing, and competing with open-wheel formula race cars on an international collegiate level. Comprising over 50 dedicated students from diverse fields, the team leverages its broad skill sets to foster innovation, organization, and competitiveness.

Every year, AER aims to enhance their performance at FSAE events using advanced design software, cutting-edge manufacturing techniques, and rigorous local testing and validation methods, consistently striving to create the best formula student EV race car.

Formula SAE Electric Vehicle (FSAE EV) is a collegiate competition where student teams design, build, and race electric formula-style cars, showcasing cutting-edge automotive technologies and sustainable practices.

WHY SUPPORT US?

As a 501(C)(3) non-profit organization, we heavily rely on sponsor support to annually construct a new electric vehicle for competition. Sponsoring our team comes with significant benefits, such as **access to new talents, tax write-off, and the opportunity to showcase your brand on our vehicle and team wear.** Not only does it enhance your visibility but also demonstrates your commitment to supporting STEM education.
