Tom Andriola
Vice Chancellor for Information, Technology & Data
Chief Digital Officer
UC Irvine

Tom Andriola joined the University of California, at Irvine (UCI) in October 2019 as the Vice Chancellor for Information, Technology and Data responsible for ensuring the effective and strategic use of data and technology across all aspects of the UCI enterprise. He works closely with the campus, faculty and healthcare leaders to explore opportunities for technology and data to drive innovation and enhance the missions of teaching, research, patient care and public service.

Prior to joining UCI, he served as Vice President & Chief Information Officer (CIO) for the entire University of California System working with campus and medical center leaders to expand the use of technology strategically and realize operational synergies. Among his accomplishments, he created an organizational and technology platform to support the collaboration of 8,000 IT professionals across the University, launched a nationally-recognized IT Leadership Academy, and played a leading role in developing UC Health's big data strategy, which led to the creation of the UC-wide clinical data warehouse representing 16 million patients.

Prior to his university service, Andriola was a business and technology leader in the healthcare industry with Philips Healthcare where he was responsible globally for technology and software products for hospitals and clinics. In that role his innovations brought first-of-kind solutions to new markets, and he managed teams on four continents.

Andriola spent the earlier years of his career as a leader for multi-billion-dollar enterprises in the capacity of a global CIO and business transformation officer with organizations such as Marconi PLC, Sapient and Price Waterhouse Coopers.

Andriola serves on the board of OCHIN, a health technology company providing software to underserved communities. He is also an advisor to software startups, medical device, and life sciences companies. He maintains advisory relationships across the university collaborating on research and innovation at the UCSD/UCI California Institute for Telecommunications and Information Technology, UC Health's Center for Data Driven Insights & Innovation, and UC Davis Innovation Institute for Food and Health.

Andriola holds a bachelor's degree from George Washington University and a master's degree from the University of South Florida, and he has completed the Stanford Executive MBA program.
