2036-37	Physical Sciences	Engineering	Arts	Humanities

* The review of Humanities is postponed by one year in this review cycle. The next review will take place according to the original schedule.

** The current process requires three "follow-up" reviews, one year, four years, and seven years after the site visit, respectively. For transition to the proposed review schedule, the committee recommends that any third follow-up reviews from the current follow-up review series (seven years after the last site visit), be waived. For those units that completed the first follow-up review in 2021-22 or 2022-23, the committee recommends that their second follow-up reviews (SFR) still be conducted as a mid-check-in point before the next scheduled APR; it should follow the current schedule (four years after the last site visit) to ensure that the units have sufficient time after their first follow-up review.
