

# UCI WiFi Setup & Tips

## About Campus WiFi

Each standard classroom has wifi access.

**Don't wait for midterms, finals, or any other critical time!**

Set up wifi ahead of time to ensure you can connect or get assistance.

## Connect to UCI-WiFi

To connect, you'll need **your Microsoft 365 account**, which is provided to all current students, faculty, and staff.

1. Join the wifi network named UCI-WiFi.
2. For **Username**, enter your **UCInetID only** (do not include your full email or "ad/").
3. For **Password**, use your **Microsoft 365 account password**.

For more information and password reset, visit: [OIT – Microsoft 365](#)<sup>1</sup>

## Troubleshooting WiFi

- Wait a few minutes and try again.
- Your device may retain a weak connection from one campus location after you've moved to another. When you arrive in class, turn wifi off, wait 10 seconds, and turn wifi on again or reboot your device to ensure you connect to the closest available access point for a strong, stable wifi signal.
- As a *temporary workaround* (not recommended for regular use), try the UCI-Guest network; more information: [OIT - UCI WiFi Guide](#)<sup>2</sup>
