1. PRODUCT AND COMPANY IDENTIFICATION

MICROPOSIT™ MF-312 DEVELOPER

Revision date: 01/01/2004

Supplier

ROHM AND HAAS ELECTRONIC MATERIALS LLC
A Subsidiary of The Dow Chemical Company
455 FOREST STREET
MARLBOROUGH, MA 01752 United States

For non-emergency information contact: 215-592-3000

For non-emergency information contact: 508-481-7950

Emergency telephone number

1 800 424 9300

Local emergency telephone number

989-636-4400

3. HAZARDS IDENTIFICATION

Emergency Overview

Appearance

Form liquid
Colour clear
Odour amines
### Hazard Summary

**DANGER!**
Corrosive alkaline liquid and vapor causes severe skin and eye burns. Causes respiratory irritation. Onset of symptoms may be delayed. Prolonged, repeated contact, inhalation, ingestion, or absorption through the skin, may cause toxic effects to internal organ systems (liver, kidney, central nervous system).

### Potential Health Effects

**Primary Routes of Entry:** Inhalation, ingestion, eye and skin contact.

**Eyes:** Will cause severe conjunctival irritation, corneal damage, and may result in loss of vision.

**Skin:** Material will cause chemical burns. Absorption through burns or open wounds may have the following effects:
- central nervous system depression

**Ingestion:** Swallowing may have the following effects:
- corrosion of mouth, throat and digestive tract
- Repeated doses may have the following effects:
- central nervous system depression

**Inhalation:** Inhalation may have the following effects:
- severe irritation of nose, throat and respiratory tract
- Higher concentrations may have the following effects:
- severe irritation to nose, throat and respiratory tract and possibly lung damage
- systemic effects similar to those resulting from ingestion

**Target Organs:**
- Eye
- Respiratory System
- Skin
- nervous system

**Carcinogenicity**
Not considered carcinogenic by NTP, IARC, and OSHA

### 4. FIRST AID MEASURES

**Inhalation:** Remove from exposure. If there is difficulty in breathing, give oxygen. Immediate medical attention is required

**Skin contact:** Immediately flush the skin with large quantities of water, preferably under a shower. If skin contact occurs, remove contaminated clothing and wash skin thoroughly. Continue washing for at least 20 minutes. Contaminated clothing should be washed or dry-cleaned before re-use. Immediate medical attention is required

**Eye contact:** Immediately flush the eye with plenty of water for at least 20 minutes, holding the eye open. Immediate medical attention is required

**Ingestion:** Do not induce vomiting. Wash out mouth with water. Have victim drink 1-3 glasses of water to dilute stomach contents. Immediate medical attention is required. Never administer anything by mouth if a victim is losing consciousness, is unconscious or is convulsing.

**Notes to physician**
Treat symptomatically. Treat skin burns conventionally.

### 5. FIRE-FIGHTING MEASURES

- **Flash point:** Nonflammable
- **Lower explosion limit:** not applicable
- **Upper explosion limit:** not applicable
Suitable extinguishing media: Use water spray, foam, dry chemical or carbon dioxide.

Specific hazards during fire fighting: This product may give rise to hazardous vapors in a fire.
Special protective equipment for fire-fighters: Wear full protective clothing and self-contained breathing apparatus.
Further information: May emit corrosive vapor or mist.

6. ACCIDENTAL RELEASE MEASURES

Personal precautions
Wear suitable protective clothing.
Wear respiratory protection.
Material can create slippery conditions.

Environmental precautions
Prevent the material from entering drains or water courses.
Do not discharge directly to a water source.
Advise Authorities if spillage has entered watercourse or sewer or has contaminated soil or vegetation.

Methods for cleaning up
Spills may be absorbed with appropriate absorbent material for alkaline materials.
Transfer into suitable containers for recovery or disposal.

7. HANDLING AND STORAGE

Handling
Use local exhaust ventilation. Avoid contact with eyes, skin and clothing. Facilities storing or utilizing this material should be equipped with an eyewash facility and a safety shower. Avoid breathing vapor. Keep container tightly closed.

Further information on storage conditions: Practice good personal hygiene to prevent accidental exposure.

Storage
Storage conditions: Store in original container. Storage area should be: cool dry well ventilated out of direct sunlight away from incompatible materials

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Exposure limit(s)
Exposure limits are listed below, if they exist.

Eye protection: Chemical goggles and face shield.

Hand protection: Neoprene gloves. Other chemical resistant gloves may be recommended by your safety professional. Gauntlet sleeves.

Skin and body protection: rubber or neoprene apron

Respiratory protection: Respiratory protection if there is a risk of exposure to high vapor concentrations. The specific respirator selected must be based on the airborne concentration found in the workplace and must not exceed the working limits of the respirator.

Engineering measures: Engineering methods to prevent or control exposure are preferred. Methods include process or personnel enclosure, mechanical ventilation (local exhaust), and control of process conditions.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance
Form liquid
Colour: clear  
Odour: amines  

pH: 13  
Boiling point/range: 100 °C (212 °F)  
Flash point: Nonflammable  
Lower explosion limit: not applicable  
Upper explosion limit: not applicable  
Vapour pressure: Similar to water

Component: Tetramethylammonium hydroxide

Vapour pressure: 17.5 mmHg at 20 °C

Relative vapour density: no data available

Water solubility: completely soluble

Relative density: 1.00

Evaporation rate: Slower than ether

VOC’s: not applicable

NOTE: The physical data presented above are typical values and should not be construed as a specification.

10. STABILITY AND REACTIVITY

Hazardous reactions: Stable under normal conditions.

Conditions to avoid: contact with incompatible materials

Materials to avoid: Strong oxidizing agents, acids

Hazardous decomposition products: triethylamine, nitrogen oxides (NOx), oxides of carbon, Methanol, polymerization: Will not occur.

11. TOXICOLOGICAL INFORMATION

Toxicological information on this product or its components appear in this section when such data is available.

Component: Tetramethylammonium hydroxide

Acute dermal toxicity: 2.1 %(m)

A single 4h semi-occlusive application to intact rabbit skin produced no signs of dermal irritation.

No clinical signs of toxicity were observed.

DOT Corrosivity testing conducted on stainless steel and laboratory animals determined that this product is not corrosive.
Acute dermal toxicity 3.5 %(m)
A single 4h semi-occlusive application to intact rabbit skin produced minimal signs of irritation (mean scores for erythema or edema less than 2).
No clinical signs of toxicity were observed.

Component: Tetramethylammonium hydroxide
Acute dermal toxicity 5 %(m)
A single 4h semi-occlusive application to intact rabbit skin produced burns (full thickness destruction of skin).
This material is corrosive.
No clinical signs of toxicity were observed.
Corrosive to aluminum per DOT corrosivity testing.

Component: Tetramethylammonium hydroxide
Acute dermal toxicity 7 %(m)
A single 4h semi-occlusive application to intact rabbit skin produced burns (full thickness destruction of skin).
This material is corrosive.
No clinical signs of toxicity were observed.
Corrosive to aluminum per DOT corrosivity testing.

Component: Tetramethylammonium hydroxide
Acute dermal toxicity <5% (w/v):
Repeated application to rat skin for 6 h/d, 5 d/wk for 4 weeks did not produce systemic toxicity.
Test material was applied continuously through a reservoir affixed to shaved animal backs.

Component: Tetramethylammonium hydroxide
Acute dermal toxicity >=5% (w/v):
Repeated application to rat skin for 6h/d, 5d/wk for 4 weeks produced rapid toxicity and following effects:
convulsions
death
Effects were noted after 2 hours of initial application.
Test material was applied continuously through a reservoir affixed to shaved animal backs.

Component: Tetramethylammonium hydroxide
Acute dermal toxicity LD50 guinea pig 25 mg/kg 100% (by weight).

12. ECOLOGICAL INFORMATION

Ecotoxicological information on this product or its components appear in this section when such data is available.

Tetramethylammonium hydroxide
Ecotoxicity effects
Toxicity to aquatic invertebrates

LC50 ceriodaphnia dubia (water flea) 96 h
0.07 - 1.2 mg/l

A pH neutralized solution has been shown to be toxic to aquatic organisms.

13. DISPOSAL CONSIDERATIONS

Environmental precautions: Prevent the material from entering drains or water courses. Do not discharge directly to a water source. Advise Authorities if spillage has entered watercourse or sewer or has contaminated soil or vegetation.

Dispose

Dispose in accordance with all local, state (provincial), and federal regulations. Under RCRA, it is the responsibility of the product’s user to determine at the time of disposal, whether the product meets RCRA criteria for hazardous waste. This is because the product uses, transformations, mixtures, processes, etc. may render the resulting materials hazardous. Do not remove label until container is thoroughly cleaned. Empty containers may contain hazardous residues. This material and its container must be disposed of in a safe way.

14. TRANSPORT INFORMATION

DOT

Proper shipping name: Tetramethylammonium hydroxide solution
UN-No: UN 1835
Class: 8
Packing group: II

IMO/IMDG

Proper shipping name: TETRAMETHYLAMMONIUM HYDROXIDE SOLUTION
UN-No: UN 1835
Class: 8
Packing group: II

15. REGULATORY INFORMATION

SARA TITLE III: Section 311/312 Categorizations (40CFR370): Immediate (acute) Health Hazard

SARA TITLE III: Section 313 Information (40CFR372)
This product does not contain a chemical which is listed in Section 313 at or above de minimis concentrations.

U.S. Toxic Substances Control Act (TSCA) Section 12(b) Export Notification (40 CFR 707, Subpt D):
U.S. Toxic Substances Control Act (TSCA) Section 12(b) Export Notification (40 CFR 707, Subpt D)
This product does not contain any substances subject to Section 12(b) export notification.

US. Toxic Substances Control Act (TSCA) All components of this product are in compliance with the inventory listing requirements of the U.S. Toxic Substances Control Act (TSCA) Chemical Substance Inventory.

California (Proposition 65)
This product does not contain materials which the State of California has found to cause cancer, birth defects or other reproductive harm.
