</tr>
</tbody>
</table>

1.2 Identified uses of the product and uses advised against

Intended Uses
For R&D use only.

Restrictions
Not intended for drug or household use.

1.3 Identification of the company
Orthogonal Inc.
Building 82, RM A778
1999 Lake Ave.
Rochester, NY 14650-2103
1-585-254-2775
www.orthogonalinc.com
Hours of operation: Monday-Friday 8 a.m. to 5 p.m. EST

1.4 Emergency Telephone Number
Section 2. Hazards identification

2.1 Classification of the substance or mixture
CLP Regulation (EC) No 1272/2008

CLASSIFICATION: Irritating to eyes, respiratory system and skin (GHS)

2.2 Label elements
CLP Regulation (EC) No 1272/2008

Pictogram:
Signal word: Irritant
Hazard Statement(s): H316: Causes mild skin irritation
H320: Causes eye irritation
H335: May cause respiratory irritation
Precautionary statement(s): P262: Do not get in eyes, on skin, or on clothing
Hazard symbols: Xi, irritant
R-phrase(s): R36: Irritating to eyes
R37: Irritating to respiratory system
R38: Irritating to skin
Other hazards: None

Main symptoms
Effects from Eye Contact: Irritating to eyes: Signs/symptoms may include redness, pain and tearing.
Effects from Skin Contact: Irritating to the skin, eyes, and respiratory system.
Effects from Inhalation: May be harmful if inhaled. Causes respiratory tract irritation.
Effects from Ingestion: No data available for humans.
Carcinogenicity: No data available for humans. Avoid prolonged exposure. Do not breath vapor. Use caution when handling. Exposure to any chemical should be limited. To the best of our knowledge, the health hazards of this material have not been fully investigated.

For information on ingredient occupational exposure limits, PBT or vPvB status, see sections 8 and 12 of this safety data sheet.

Section 4. First-aid measures

4.1 Description of first aid measures

**Skin contact:** Wash affected area with soap and water. If signs/symptoms develop, get medical attention.

**Eye contact:** Flush eyes with large amounts of water. If signs/symptoms persist, get medical attention.

**Inhalation:** Remove person to fresh air. If signs/symptoms develop, get medical attention.

**Ingestion:** Do not induce vomiting unless instructed to do so by medical personnel. Never give anything by mouth to an unconscious person. If you feel unwell, get medical attention.

4.2 The most important symptoms and hazardous effects both acute and delayed
See section 11 for information on toxicological effects.

4.3 Indication of immediate medical attention and special treatment needed
Not applicable

Section 5. Fire-fighting measures
5.1 Suitable Extinguishing Media
Use a fire fighting agent suitable for ordinary combustible material such as water or foam to extinguish.

5.2 Specific hazards arising from the chemical
Exposure to extreme heat can give rise to thermal decomposition. See section 10 for stability and reactivity information.

5.3 Special protective equipment and instructions for fire-fighters
Wear full protective equipment (Bunker Gear) and a self-contained breathing apparatus (SCBA).

Section 6. Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures
Evacuate the area. Ventilate with fresh air.

6.2 Environmental precautions
Avoid release to the environment. For larger spills, cover drains and build dikes to prevent entry into sewer systems or bodies of water.

6.3 Methods and material for containment and cleaning up
Contain spill. Working from around the edges of the spill inward, cover with bentonite, vermiculite, or commercially available inorganic absorbent material. Mix in sufficient absorbent until it appears dry. Remember, adding an absorbent material does not remove a physical, health, or environmental hazard. Collect as much of the spilled material as possible. Place in a closed container approved for transportation by appropriate authorities. Clean up residue with an appropriate solvent selected by a qualified and authorized person. Ventilate area with fresh air. Read and follow safety precautions on the solvent label and SDS. Seal the container. Dispose of collected material as soon as possible according to local/regional/national and international regulations.

6.4 Reference to other sections
See sections 8 and 13 for more information.

Section 7. Handling and storage

7.1 Precautions for safe handling
Do not breathe thermal decomposition products. Avoid skin contact with hot material. For industrial or professional use only. Do not eat, drink or smoke when using this product. Wash thoroughly after handling. Avoid contact with oxidizing agents (eg. chlorine, chromic acid etc.)

7.2 Conditions for safe storage including any incompatibilities
Store in a well-ventilated place. Keep container tightly closed. Store away from heat. Store away from acids. Store away from strong bases. Store away from oxidizing agents.
7.3 Specific end uses
See section 7.1 and 7.2 for recommended handling and storage. See section 8 for exposure controls and personal protection recommendations.

Section 8. Exposure controls / personal protection

8.1 Control Parameters

Occupational Exposure limits
If a component is disclosed in section 3 but does not appear in the table below, an occupation exposure limit is not available.

<table>
<thead>
<tr>

</tbody>
</table>

Biological limit values
No biological limit values exist for any of the components listed in section 3 of this SDS.

8.2 Exposure Controls

8.2.1 Engineering Controls
Use with appropriate local exhaust ventilation on open containers. For those situations where the fluid might be exposed to extreme overheating due to misuse or equipment failure, use with appropriate local ventilation sufficient to maintain levels of thermal decomposition products below their exposure guidelines. Provide appropriate local exhaust when product is heated.

8.2.2 Personal protective equipment (PPE)

Eye Protection: Safety glasses with side shield

Applicable standards: Use eye protection conforming to EN 166.

Skin/Hand Protection: Gloves made from the following material are recommended.

<table>
<thead>
<tr>
<th>Material</th>
<th>Thickness (mm)</th>
<th>Breakthrough time</th>
</tr>
</thead>
<tbody>
<tr>
<td>Neoprene</td>
<td>No data available</td>
<td>No data available</td>
</tr>
</tbody>
</table>

Applicable standards: Use gloves conforming to EN 374
If this product is used in a manner presenting a high potential for exposure, protective coveralls may be necessary. A Neoprene apron is recommended.

**Respirator Protection:** Under normal conditions, airborne exposures are not expected to be significant enough to require respirator protection. In case of heating, use a respirator or appropriate local exhaust.

**Thermal hazards**
Wear heat insulating gloves when handling hot material

Applicable standards: Use gloves conforming to EN 407

---

**Section 10. Stability and reactivity**
10.1 Reactivity
This material is considered to be non-reactive under normal use conditions.

10.2 Chemical stability
Stable.

10.3 Possibility of hazardous reactions
Hazardous polymerization will not occur.

10.4 Conditions to avoid
None known.

10.5 Incompatible materials
Strong acids
Strong bases
Strong oxidizing agents

10.6 Hazardous decomposition products
Carbon monoxide, carbon dioxide, hydrogen fluoride, toxic vapor, gas, particulate may form at elevated temperatures, extreme conditions of heat.

Extreme heat arising from situations such as misuse or equipment failure can generate hydrogen fluoride as a decomposition product.

Section 11. Toxicological information

11.1 Information on Toxicological effects
Based on test data and/or information on the components, this material may produce the following health effects:

Inhalation:
No known health effects. Vapors from heated material may cause irritation of the respiratory system. Signs/symptoms may include cough, sneezing, nasal discharge, headache, hoarseness, and nose and throat pain.

Skin Contact:
Contact with the skin during product use is not expected to result in significant irritation.

Eye Contact:
Contact with the skin during product use is not expected to result in significant irritation. Vapors from heated material may cause eye irritation. Signs/symptoms may include redness, swelling, pain, tearing, and blurred or hazy vision.

Ingestion:
May be harmful if swallowed.

Acute toxicity

</thead>
</table>
Hydrofluoro ether | Inhalation – vapor (2 hours) | Rat | LD50 > 10 mg/L

**Skin Corrosion/Irritation**
Either no data is currently available or there is not sufficient data to classify this product.

**Serious Eye Damage/Irritation**
Either no data is currently available or there is not sufficient data to classify this product.

**Skin Sensitization**
Either no data is currently available or there is not sufficient data to classify this product.

**Respiratory sensitization**
Either no data is currently available or there is not sufficient data to classify this product.

**Germ Cell Mutagenicity**
Either no data is currently available or there is not sufficient data to classify this product.

**Carcinogenicity**
No component of this product present at levels greater that 0.1% is identified as probable, possible or confirmed human carcinogen.

**Reproductive Toxicity**
**Reproductive and/or Developmental Effects**
Either no data is currently available or there is not sufficient data to classify this product.

**Target Organ(s)**
**Specific Target Organ Toxicity - single exposure**
Inhalation. May cause respiratory irritation (GHS)

**Specific Target Organ Toxicity – repeated exposure**
Either no data is currently available or there is not sufficient data to classify this product.

**Aspiration Hazard**
Either no data is currently available or there is not sufficient data to classify this product.

**Other toxicological Information**
Hydrogen Fluoride has an ACGIH Threshold Limit Value of 3 parts per million (as fluoride) as a Ceiling Limit and an OSHA PEL of 3 ppm of fluoride as an eight-hour Time-Weighted Average and 6 ppm of fluoride as a Short-Term Exposure Limit. The odor threshold for HF is 0.04 ppm, providing good warning properties for exposure.

---

**Section 12. Ecological information**

**12.1 Toxicity**
Acute aquatic hazard
No information available

12.2 Persistence and degradability

Abiotic
Air, photolysis: Ozone depletion potential: ODP=0
Reference value for CFC 11: OPD=1
Air, greenhouse effect: No data available.
Reference value for carbon dioxide: GWP=1
Biotic: No data available

12.3 Bioaccumulative potential
No information available

12.4 Mobility in soil
No information available

12.5 Results of PBT and vPvB tests
No information available

12.6 Other adverse effects
None

Section 13. Disposal considerations

13.1 Waste Treatment methods
Dispose of contents/ container in accordance with the local/regional/national/international regulations.

Dispose of waste product in a permitted industrial waste facility. As a disposal alternative, incinerate in a permitted waste incineration facility. Proper destruction may require the use of additional fuel during incineration processes. Combustion products will include halogen acid (HCl/HF/HBr). Facility must be capable of handling halogenated materials. Empty drums/barrels/containers used for transporting and handling hazardous chemicals (chemical substances/mixtures/preparations classified as Hazardous as per applicable regulations) shall be considered, stored, treated & disposed of as hazardous wastes unless otherwise defined by applicable waste regulations. Consult with the respective regulating authorities in your country to determine the available treatment and disposal facilities.

Potential for Recycling
Reclaim if feasible.

EU waste code (product as sold)
14 06 04* Sludges or solid wastes containing halogenated solvents
The waste code is also based on the application of the product by the client. Please refer to the European Waste Code (EWC-2000/532/CE and its amendments) to determine the proper code for your waste. Make sure you are in accordance with applicable national and local regulations.

Section 14. Transportation information

Not hazardous for transportation

Section 15. Regulatory information

15.1 Safety, health and environmental regulations/legislations specific for the substance

Table of occupational hazards (INRS France)

| 32 | Occupational hazards caused by fluorine, hydrofluoric acid and its salts |

United States Regulations

NFPA Hazard Classification

| Health: 3 | Flammability: 0 | Reactivity: 0 | Special Hazards: None |

National Fire Protection Association (NFPA) hazard ratings are designed for use by emergency response personnel to address the hazards that are presented by short-term, acute exposure to a material under conditions of fire, spill, or similar emergencies. Hazard ratings are primarily based on the inherent physical and toxic properties of the material but also include the toxic properties of combustion or decomposition products that are known to be generated in significant quantities.

HMIS Hazard Classification

| Health: 1 | Flammability: 0 | Reactivity: 0 | Protection: X -See PPE section. |

Hazardous Material Identification System (HMIS®) hazard ratings are designed to inform employees of chemical hazards in the workplace. These ratings are based on the inherent properties of the material under expected conditions of normal use and are not intended for use in emergency situations. HMIS® ratings are to be used with a fully implemented HMIS® program. HMIS® is a registered mark of the National Paint and Coatings Association (NPCA)

15.2 Chemical Safety Assessment

A chemical safety assessment has not been carried out for this product in accordance with regulation (EC) No 1907/2006 as amended.

Section 16. Other information
Revision Information: This document was revised from the GHS version to be in accordance with EU Reach Regulation (EC) 1907/2006 and its modifications to the best of our capabilities.

The information in this Safety Data Sheet (SDS) is believed to be correct as of the date issued. However, no guarantee or warranty of any kind, expressed or implied, is made by Orthogonal Inc. with respect to such information.
