Expanding Research

The CVL welcomed two new faculty members this semester. Dr. Noa Ofen *(above left)* and Dr. Lee hyun Yoon *(above right)* joined the center’s seven other research labs in January...
Dear Friends,

What a thrilling time to be part of the CVL! As we move into the spring semester, we are happy to welcome two new faculty members, Dr. Noa Ofen and Dr. Leehyun Yoon along with their labs that will continue to expand the research efforts and increase our mission of cognitive health for life. We will be hosting two big events this semester. One being our biennial symposium on aging and mental health, and the other being our public, spring lecture hosted in conjunction with the Texas Instruments Alumni Association. This semester's spring lecture will be presented by Dr. Frank R. Lin who will be discussing hearing loss, cognitive decline, and dementia. I hope to see you all at these events. Thank you for your continued support of our research.

Sincerely,

Dr. Michael Rugg
Director, Center for Vital Longevity

**Research**

**Broader Impact of Alzheimer’s**

CVL researchers publish new evidence showing changes in brain network patterns that occur in early-stage Alzheimer’s disease differ from those associated with normal aging.
