HI! MY NAME IS ARI THE ARMADILLO AND I STUDY THE NIGHT SKY.
HAVE YOU HEARD ABOUT THE UPCOMING SOLAR ECLIPSE? I’M EXCITED TO SEE IT IN THE MIDDLE OF THE DAY!

WE HAVE TO BE CAREFUL, THOUGH. WE SHOULD NEVER STARE AT THE SUN. THE SUN CAN BURN OUR EYES!

WE CAN LOOK UP AT THE SUN WITH ECLIPSE GLASSES OR SPECIAL VIEWERS CALLED FILTERS.

SO, HOW CAN WE SAFELY WATCH THE SUN WHILE THE MOON PASSES IN FRONT OF IT?
WE CAN LOOK DOWN TO SEE THE ECLIPSE. WE CAN LOOK UNDER TREES.

WE CAN USE ANYTHING WITH A SMALL HOLE OR HOLES IN IT.

WE CAN ONLY LOOK UP WITH JUST OUR EYES IF THE MOON COMPLETELY COVERS THE SUN.
THE SOLAR ECLIPSE IS RARE AND SPECIAL. IT’S ALSO FOR EVERYONE! I HOPE YOU’LL HELP ME SHARE HOW TO SEE IT SAFELY.
